

The Green Most Absorbent Spill Clean Up Product

SPILLCLEANUP™ is made from the plant particles of the kenaf plant. Kenaf plant particles are the world's most absorbent natural material. Numbers of research studies confirm this, including one by the U.S. Navy, which state kenaf particles and powder is the "most absorbent natural material on earth".

SPILLCLEANUP™

- Use for Oil, Diesel Fuel, Hydraulic Fluid, Solvents, Water and Most Other Liquid Spills.
- 30 Times More Absorbent than Clay.
- Just pour on most spills.
- Easy to sweep up for disposal.
- Starts drawing up liquid very quickly.
- Soaks up the most volume by weight.
- Made from a plant, not a chemical or a polymer and is not toxic, a truly **GREEN** product.
- Easy to handle saves time in a spill emergency

SPILLCLEANUP™ is quick and cost effective in cleaning up oil or other spills on land or water. (30 times more absorbent than clay)

Use **SPILLCLEANUP** for engine shop maintenance or for emergency spill response. For shop maintenance apply a small amount of **SPILLCLEANUP** under a dripping engine oil spill or other liquid spills, keeping the work area safe from slippery falls (works 30 times better than clay or kitty litter). **SPILLCLEANUP** controls spills in an emergency response on a highway and is used to absorb the liquid quickly for proper disposal.

DISPOSAL: Properly dispose of according to applicable Federal, State and Local Regulations for the type of liquid that is absorbed by the **SPILLCLEANUP** product. The **SPILLCLEANUP** product by itself is non-toxic cellulose plant material.

SPILLCLEANUP is made of natural plant material from a plant called kenaf. The kenaf plant is related to cotton, hibiscus and okra. Its origin is Africa and it was grown for fiber and fuel in ancient Egypt. We are just unlocking the secrets of this amazing plant. The natural fibers of the kenaf plant are used in many products such as: light weight plastic composites, erosion control blankets, high quality paper, cloth and many other products. The kenaf plant is grown in the USA and can reach 12 to 16 feet tall in a single year.

Kenaf plant stalks green and dried.

SPILLCLEANUP contains only kenaf plant material.

Available in following packages:
30 Gallon Barrels
3 Cubic Foot Paper Bags
